

# Practical Lessons From Creating the Control-Alt-Hack™ Card Game

## Research Challenges for Games In Education and Research

Tamara “Tammy” Denning  
**Adam “Adam” Shostack**  
Tadayoshi “Yoshi” Kohno

*University of Washington*

....aka, a talk about cake.

You can have your cake and eat it too.

You can have your cake and eat it too.

# Diversify positive outcomes

Primary design goal was for recreational, voluntary play

Evaluated (and published) on the classroom context

You can have your cake and eat it too.

# Diversify positive outcomes

Primary target audience was age 18-30 in CS and STEM

First interested (evangelizing?) group was security-minded

You can't have all the cakes.

# Prioritize

You can't have all the cakes.

## Tradeoffs between:

- Control over details
- Calendar time
- Person-hours
- Cost
- Quality

# Prioritize

## Target audience & play context influences:

- Graphic design & illustration
- Properties of mechanics
- Level of technical detail
- Jokes/references to include
- Mechanics choice

You don't have to start from scratch.

# Pre-Existing Mechanics

You're probably not a master at gaming mechanics

Put your time & effort on the important parts

Use quality ingredients.

# Locating Expertise

## Many people (can be) involved:

- Mechanics Designer
- License Coordinator
- Graphic Designer
- Illustrator
- Manufacturer
- Production Manager
- Trademark Lawyer
- Distributor
- Retailer

Decide how to serve your cake.

# Distribution/ Production Decisions

Download and self-print

Print-on-demand

Domestic (Smaller) Print Run

International (Larger) Print Run

# Distribution/ Production Decisions

## Tradeoffs between:

- Cost per unit
- Customizability
- Quality
- Minimum order size

# Distribution/ Production Decisions

## **Affects:**

- Timeline
- Graphic Design/Illustration Parameters
- Budget

Can you have too much cake?

Can you have too much cake?
